Statement of Financial Position Analysis

1.0 Assets

Total assets as of June 30, 2026 totaled Ps 350,741.1 billion, increasing 3.9% versus March 31, 2026 and 4.5% versus June 30, 2025. The annual change was driven by three main dynamics: a 99.8% decrease in non-current assets held for sale to Ps 44.3 billion, reflecting the derecognition of MFG's non-current assets held for sale following the closing of the transaction; a 7.6% increase in total loans, net to Ps 189,782.3 billion; and a 43.3% growth in trading assets to Ps 35,176.9 billion.

1.1 Loan portfolio

Gross loans, excluding interbank and overnight funds, reached Ps 197,718.7 billion as of June 30, 2026, increasing 2.1% versus March 31, 2026 and 7.6% versus June 30, 2025 on a continuing operations basis. The annual growth was driven by a 7.7% increase in commercial loans to Ps 112,709.5 billion, a 15.7% increase in mortgages to Ps 23,535.2 billion, and a 4.7% increase in consumer loans to Ps 61,473.3 billion.

Interbank & overnight funds decreased by 65.0% to Ps 516.7 billion between June 30, 2026, and June 30, 2025.

Loss allowance was Ps 8,453.1 billion as of June 30, 2026, taking net loans to Ps 189,782.3 billion.

In terms of currency, for our gross loans, 92.1% are Peso denominated loans and 7.9% are USD denominated.

A 15.5% yearly and 6.0% quarterly appreciation of the Peso relative to the U.S. Dollar, negatively impacted growth metrics for US Dollar denominated loans in Pesos.

Commercial loans increased 2.4% versus 1Q26 and 7.7% versus 2Q25. Over the year, peso-denominated loans grew 10.9%, while dollar-denominated loans increased 5.2% in dollar terms.

Consumer loans increased by 1.1% versus 1Q26 and 4.7% versus 2Q25, driven mainly by an increase in personal loans.

Mortgages increased by 2.9% versus 1Q26 and 15.7% versus 2Q25, while we maintain a strong position in this segment, we deliberately continue to moderate our origination pace relative to 2025.

The following table shows the gross loan composition per product of each of our loan categories.

(1) Net interest margin is calculated as net interest income divided by the total average interest-earning assets, excluding the average interest-earning assets contributed by MFG.

(2) NIM on investments is calculated as Net Interest income on fixed income securities, net trading income from equity and fixed income investment securities held for trading through profit and on interbank and overnight funds to average fixed income securities, debt and equity securities FVTPL, interbank and overnight funds.

(3) Interest expense is allocated to each asset class in proportion to its contribution to total interest-earning assets.

Total consolidated NIM was 5.5% in 2Q26, compared to 3.3% in 1Q26 and 4.2% in 2Q25. Variation was driven by a recovery in NIM on investments to 8.7% from 0.3% in 1Q26, product of (i) a significant improvement in the Colombian sovereign debt market after June's presidential election and (ii) a sustained increase of our average investment portfolio of 3.2% compared to 1Q26 and of 17.6% compared to 2Q25. NIM on loans slightly increased by 1 basis point quarter-on-quarter to 4.4%. On a year-on-year basis, the 130-basis point increase in total NIM from 4.2% to 5.5% was affected by the same factors that drove our quarterly variation.

Broken down by operating segment, banking services reached Ps 246,549.0 billion in interest-earning assets, growing 1.9% quarter-on-quarter and 8.9% year-on-year. Banking services NIM continues its recovery, reaching 6.1% from 4.2% in 1Q26, mainly driven by the repricing of loan yields for commercial loans. The pension and severance fund segment reached Ps 3,701.2 billion in interest-earning assets, growing 18.7% year-on-year and 2.1% quarter-on-quarter, with NIM reaching to 24.7% from 3.4% in 1Q26, driven by the same fixed-income market dynamics that affected our overall NIM. Our merchant banking segment, given its investment-driven nature, structurally results in a negative NIM, as its returns are mainly captured through gross profits from sales of goods and services rather than interest income.

Cost of risk, net for the quarter reached 1.9%, 8 basis points higher compared to 1Q26 and 5 basis points compared to 2Q25. Commercial loans quarterly variation was driven mainly by higher loss allowances in stage 3 loans. In the case of consumer loans, the variation is mostly explained by a net cost of risk increase for personal loans. Finally, mortgage loans continue to present healthy cost of risk metrics, with net cost of risk for the quarter reaching 0.5%, 20 and 52 basis points lower compared to 1Q26 and 2Q25, respectively.

The following table shows our gross loan classification by Stages in accordance with IFRS 9 (interbank and overnight funds are not included as they tend to be mostly Stage 1 and with low loss allowance due to their characteristics and short-term nature).

I 2Q2026

Other income

Other income reached Ps 269.9 billion for the quarter, decreasing by 31.9% and increasing 93.9% on a quarterly and an annual basis, respectively. Quarterly variation was mainly driven by the decrease in dividends (which are stationary) and in net gain (loss) on sale of debt and equity securities

Other expenses for the quarter reached Ps 2,356.9 billion and decreased 8.1% compared to last quarter and increased 7.4% compared to the same period last year. Quarterly decrease was mainly due to a 20.4% decrease in administrative and other expenses, mostly from the implementation of a one-time equity tax by the Colombian government that increased expenses by Ps 311.7 billion in 1Q26.

The ratio of other expenses as a percentage of average assets reached 2.7% in 2Q26, compared to 3.0% in 1Q26 and 2.6% in 2Q25.

Cost to income efficiency ratio was 49.3% in 2Q26, compared to 53.9% for 1Q26 and 53.3% for 2Q25.

Income tax expense for the group reached Ps 531.0 billion and decreased by 8.1% compared to the previous quarter and increased by 45.6% compared to the same quarter of the previous year.

Grupo Aval's income tax expense divided by net income before income tax expense excluding dividends and share of profit of equity accounted investees, net of tax (as they are non-taxable income), was 37.2% in 2Q26, 50.1% in 1Q26 and 36.7% in 2Q25. The quarterly decrease in tax expense is mainly explained by the equity tax expense during 1Q26, as it is non-deductible.

Net income attributable to non-controlling interest

Net income attributable to non-controlling interest reached Ps 404.4 billion and decreased 1.4% versus 1Q26 and increased by 4.0% compared to 2Q25. The ratio of net income attributable to non-controlling interest to net income reached 41.2% in 2Q26 compared to 54.9% in 1Q26 and 44.0% in 2Q25. The decrease in this ratio is mainly attributable to a change in the mix of our segments' contribution to net income, driven by a higher contribution to net income from our banking segment.
